French Press, Manual Coffeemakers Satisfy Consumers' Artisanal Preferences

The beverage category is one that continues to change and expand as consumers explore new ways to prepare and enjoy their favorite drinks, and suppliers continue to offer innovative products that enable them to do so. Coffee in particular is seeing its own renaissance of new preparation methods as consumers continue to enjoy customizing their brews.

While electric coffee brewers have been a staple in the kitchen for decades and has undergone notable transformations in the last five years, the rise in customized and artisanal coffee preferences has seeped innovation into the manual, non-electric category as well. New introductions this year in pour-over and French press coffee makers invite users to make their favorite brews with easier-to-clean, easier-to-serve, better-tasting and on-trend design features that should satisfy a wide range of consumer tastes.

Frieling's new Black French Press has a two-stage filtering process that consists of a pre-filter and an added super-fine mesh. The patented mesh catches any coffee grounds that may have passed through the pre-filter.

Lifetime's La Cafetiere Magnifique 8-cup French Press with easy clean twist bottom features a patent-pending detachable bottom compartment that catches the grounds after pressing for easy disposal.

Bialetti's new ceramic pour over coffee dripper and mug features a porcelain design with a brewer and cup that combine to produce a 10-12 ounce cup of coffee.
