3-PLY BONDED CONSTRUCTION

NO SILICONE

RIVITED, COOL TOUCH HANDLE

COMMERCIAL QUALITY

OVEN SAFE UP TO 540°F

SUITABLE FOR ALL COOKTOPS

LIMITED LIFETIME WARRANTY

CLEANS LIKE NONSTICK

DISHWASHER SAFE

NO PFAS

You can rely on CeramicQR™ from breakfast through dinner:

- Fry up bacon or sausage, sear and brown meat, sauté seafood or vegetables, makes grilled cheese sandwiches, pan sauces, French toast... the Quick Release™ advantage makes CeramicQR™ an all-around winner from France!
- A stainless steel grid raised above its silicone-free ceramic base combines the benefits of stainless steel with the benefits of ceramic nonstick. CeramicQR™ will retain its nonstick properties over time without peeling or chipping.

Use & Care Quick Tips

Before the first use, clean with dishwashing detergent and hot tap water or place in dishwasher. For best cooking results, use low or medium heat. Use a burner no larger than the bottom of the cookware. To preheat, place over medium heat. After use, allow to cool down on its own. While this is not a “nonstick egg pan” you can cook eggs in it; just add some butter and expect a little sticking. For complete Use & Care Instructions, log on to frieling.com/manuals/

WARNING To prevent burns always use potholders or oven mitts. Never leave anything cooking unattended. Excessive preheating of empty cookware or allowing anything to boil dry will cause damage. Do not use abrasives or scouring powders.
